

## **Assignment 1**

### **Group Peer Review**

Students are expected to contribute equally to the group assignment. A confidential 'Gold Coin' peer review will be conducted for all groups. If a member or members are deemed by their colleagues to not be making an adequate contribution – without acceptable extenuating circumstances, they will be penalised.

The peer review will take the following format:

*For each of your team members (including yourself), briefly comment on their contribution to the work (consider their attitudes, willingness to contribute, knowledge, written contribution, attendance at meetings, contribution to the presentation, helping keep the group together and working well, leadership, etc).*

*Now, if the team were given 100 gold coins to reward it for its work, how many coins would each member get (including yourself)?*

*So, if all team members contributed the same and you had 5 members in your group, then each team member will be given 20 Gold Coins. Of course, this will be different for a group of six.*

<b>Team Member Name</b>	<b>Contribution</b>	<b>Gold Coins</b>
1.		
2.		
3.		
4.		
5.		
6.		
<b>Total Coins</b>		<b>100</b>
